SUMMARY

Computer Science graduate (2024) focused on DevOps. Comfortable with Docker, Kubernetes, CI/CD, Terraform, and AWS, and have built and deployed several hands-on projects on EC2 to learn the full workflow end to end. Looking for a DevOps Engineer role where I can work on build pipelines, infrastructure, and deployment automation.

TECHNICAL SKILLS

Containers: Docker, Docker Compose, Kubernetes (Minikube)

CI/CD: GitHub Actions

Infrastructure as Code: Terraform

Cloud: AWS (EC2, S3, IAM, Security Groups)

Monitoring: Prometheus, Grafana, Node Exporter

OS / Scripting: Linux (Amazon Linux 2023), Bash

Version Control: Git, GitHub

Other: YAML, Nginx, DockerHub, SSH

PROJECTS

CI/CD Pipeline with Docker and GitHub Actions

Containerized a web app behind Nginx and set up a GitHub Actions pipeline that builds the image and pushes it to DockerHub on every push to main, then deploys it to an EC2 instance reachable over its public IP. Kept credentials in GitHub Secrets rather than in the repo.

Kubernetes Orchestration with Minikube

Ran a local Kubernetes cluster on EC2 using Minikube. Wrote a Deployment manifest running the app across 2 replicas and exposed it with a NodePorts. Tested self-healing by deleting pods and confirming they came back, and scaled the deployment from 2 to 4 replicas with kubectl scale.

Infrastructure as Code with Terraform

Used Terraform to provision a EC2 instance with a user-data script that installs Docker, plus a security group allowing SSH, HTTP,HTTPS, and the app ports. Ran terraform plan before applying to check changes, and used terraform destroy to tear everything down cleanly.

Monitoring Stack with Prometheus and Grafana

Hands-on experience with monitoring and visualization tools like Prometheus and Grafana for tracking application and server performance, monitoring system metrics, analyzing dashboards, and gaining exposure to alerting and performance monitoring.

EDUCATION

B.E., Computer Science & Engineering — KLE Institute of Technology, Hubli, Karnataka (2024)

Coursework: Operating Systems, Computer Networks, Cloud Computing, Database Management.

INTERNSHIP

DevOps Intern — Pixlpro Consulting Services Pvt.Ltd. (A DevDigital Company) Dec 2025 – May 2026

Managed AWS EC2 instances for application hosting, server setup, and basic administration and deployed applications on cloud servers.
